

HAZARDOUS MATERIALS ASSESSMENT OF NS DTPW HIGHWAY GARAGES AT PORT HAWKESBURY AND MARTINIQUE, NOVA SCOTIA

OCL Group was retained by Nova Scotia Dept. of Transportation and Public Works to conduct Phase I and Phase II ESA's and Hazardous Material Assessments of highway garages in Port Hawkesbury and Martinique.

The HazMat Assessment included: PCB, lead (paint and other materials), asbestos-containing materials, Hazardous Materials (including paint, vehicle maintenance materials) oil and fuel storage.

Completed risk assessment of the adjacent wetland impacted by salt storage. Completed environmental management recommendations for the management of the site.

Study recommendations were used to rectify and reduce environmental liabilities at the two sites.

Client: Nova Scotia Dept. of Transportation and Public Works.
